

# STATUS OF THE M&E AND MRV SYSTEMS IN BOLIVIA, ECUADOR AND PERU

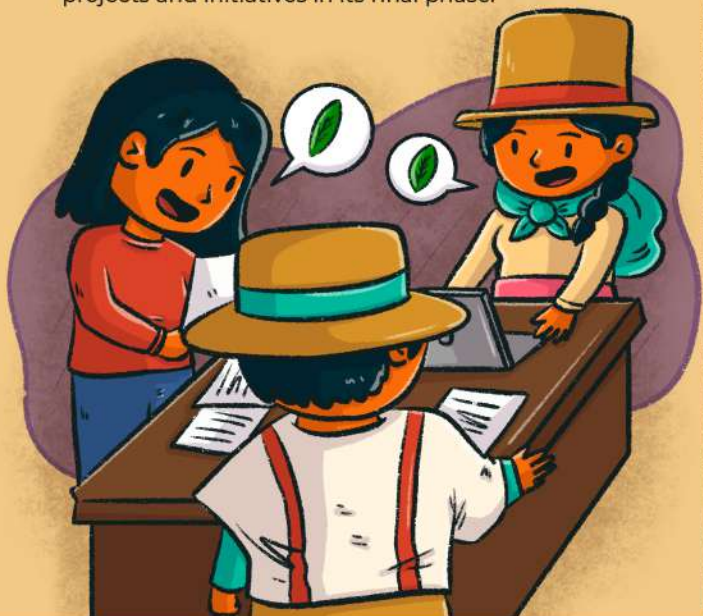

## BOLIVIA

M&E: Monitoring and Evaluation

Implementation of the Plurinational System of Information and Integral Monitoring of Mother Earth and Climate Change (MTCC System).

- System for Climate Modelling in operation.
- System of Registration and Affiliation of programs, projects and initiatives in its final phase.

## ECUADOR

Measurement, Reporting and Verification

Development of a conceptual framework for the National Registry of Climate Change (RNCC) and design of Ecuador's Measurement, Reporting and Verification (MRV) system for adaptation as part of the RNCC.

## PERÚ

M&E: Monitoring and Evaluation

Implementation of the M&E component for Peru's "Nationally Determined Contribution or NDC" actions:

- Development of M&E operating models for forests, fisheries and aquaculture, agriculture thematic areas.
- Development M&E thematic computer models for fisheries and aquaculture, and agriculture.
- Pilot developed for the M&E component of the adaptation actions.
- Preparation of the M&E tools, established in the Regulation of the Climate Change Framework Law.
